Het Heerenlanden

Doe wat telt

Heerenlanden College | Leerdam Location

Pathways: vmbo tl/mavo, havo, vwo, TTO havo/vwo

Heerenlanden is a school in Leerdam: we are a school offering mavo (tl), havo and vwo pathways. Are you from Leerdam or one of the nearby villages? Then we are the school for you! At our school, you'll quickly feel at home; we all know each other well! At Heerenlanden College, we devote a lot of time and attention to supporting our students. For example, everyone has their own mentor coach, who they meet regularly to discuss what is going well and where they might need additional help. Especially in the foundation stage (years 1-3), we organise our education in such a way that students have sufficient time to complete their homework at school.

Furthermore, in the first two years, students participate in the Heerenlanden Academy every Tuesday. Here they can choose from a variety of fun classes in and out of school. There is a lot of variety: from tennis to a styling course or from engineering or technology to a Spanish course – you name it. Students not only learn many new things, but also discover where they excel and what they might want to focus on in the future.

FORTES
TECHNASIUM ▪ ATHENEUM ▪ HAVO ▪ MAVO
LYCEUM

Fortes Lyceum | Gorinchem Location

Pathways: mavo, havo, technasium, atheneum

Our school offers public education of an innovative nature. In a constantly and rapidly changing society, it is imperative that students are equipped with 21st century skills to excel in a knowledge-based society. Besides a solid basic package aimed at technasium, atheneum, havo or mavo students, Fortes Lyceum also offers challenging programmes that match students' talents. For example, it is possible to take enhanced English at all levels such as Fast Lane English in atheneum and Cambridge English in mavo and havo, the most effective proficiency of the English language.

Our education is about developing students as people, and not just about cramming information. Activating cognitive intelligence, creative thinking in terms of difficult and innovative issues, and problem-solving have much more value. Students learn all the skills they require for their further studies and working life. All this within a small-scale, organised school community of about 1,300 students. We offer quality, order, a quiet environment and consistency, all while paying close attention to students and their parents. The triangle of student, parents and school determines the educational learning process of children and young people today. We challenge students to perform at their best in a professional learning environment where everyone feels safe, comfortable and valued. At the same time, we actively invest in students' relationships with their social environment.

forteslyceum.nl

Uilenhof
Thuis in de wereld

uilenhof.cvo-av.nl

Uilenhof | Gorinchem Location

Pathways: vmbo gl/tl, nieuwe mavo, havo-junior, TOT

Uilenhof is the number one Christian vmbo school (gl/tl/havo-junior) in Gorinchem. Both students and their parents are satisfied with our school. In particular, students achieve good results and enjoy their flex schedule.

Uilenhof offers two education pathways: mavo (vmbo gl/ tl) and havo-junior. In havo-junior, students participate in havo at Uilenhof for two years and then move on to Lyceum Oude Hoven. Flex schedule: Uilenhof uses a so-called flex schedule. Each day, students have three subject classes of 80 minutes each. These classes form a fixed part of their timetable. Outside of these classes, students choose from flex classes in the morning and afternoon.

There are three types of flex classes:

- homework flex classes, in which students collaborate with others on their homework tasks,
- subject flex classes, in which students receive extra support with regard to subjects they find difficult,
- silent flex classes, in which students work independently on their homework tasks or revise for exams.

All flex classes have a teacher who supports the students. These classes allow us to provide tailor-made support for students. Uilenhof is a homework-free school.
Working with a flex schedule means being able to be more flexible with class times and class content. This brings with it significant benefits. For example, students can – in part – decide for themselves how much time they want to spend on a subject. For example, if a student requires more help with Dutch language classes, then that's possible. Alternatively, students can spend more time on maths if needed. Everyone is different. Students participate in subject classes (required) and flex classes (tailor-made classes). Subject classes are 80 minutes, allowing for more time for teachers to guide students throughout the learning process. Thanks to our unique approach, we have more time for coaching and guidance by mentors and subject teachers.
Our flex schedule enables us to create space for executive functions such as planning, organising and reasoning, all while focusing on our students' personal development.
At various times throughout the school year, we organise challenging 'domain days' that include film screenings, excursions, guest lectures, research assignments and special events.

Lyceum **Oudehoven**

Kijk verder. Vraag verder. Doe goed.

Lyceum Oudehoven | Gorinchem Location

Pathways: havo, techniek havo, atheneum, TTO atheneum, gymnasium, TTO gymnasium

At Lyceum Oudehoven, students lay a strong foundation for their future. We prepare them optimally so that, after secondary school, they can successfully move on to vocational training in higher professional education or academic education at university.

We are a safe school offering a pleasant learning environment. Our teachers teach interesting classes that students enjoy attending. Our school challenges students to enrich their knowledge and we offer several special forms of education.

Tto (bilingual education) Students who students who have received vwo advice and who are interested in language and culture may be perfectly suited for bilingual education. Students learn to speak, write, listen and read in English and Dutch. That way, they are optimally prepared for future (university) programmes taught in English or in an English-speaking country.
Praktijkhavo If you are planning to follow the havo pathway but also enjoy being practical, then praktijkhavo (havo with a more practical focus) might be what you're looking for.

Furthermore, in the advanced stage (from year 4), students can also participate in techniekhavo or zorghavo (havo with an engineering or healthcare focus).
Regular vwo and havo pathways also offer all kinds of opportunities to broaden and/or deepen students' knowledge and interests.
In our talent stream modules, students learn about material that is not readily covered in other classes.

We believe internationalisation is important. For example, all students in the fourth year go on a European trip. Furthermore, they can choose to:

- take exams in an arts subject. Here, students play a part in our public concert to showcase their work during a public exhibition.
- participate in our debate club.
- increase their knowledge of French, German or English by gaining additional qualifications in these subjects.
- enhance their talents for science subjects by participating in the U-talent Academy. This is a collaboration with the University of Utrecht. Dit is een samenwerking met de Universiteit van Utrecht.

omnia college

Omnia College
Gorinchem Location

Pathways: vmbo basis/kader/GL

Entrepreneurship class / Engineering class / Carpentry class / Care and welfare / Cooking class / Horse class / Sports class

omniacollege.nl

Omnia College gives students all the room they need to grow, allows them to choose their own subject and theme classes and provides 1-on-1 support from a personal coach. We believe it is important for students to discover themselves and their innate talents.
Our broad offering allows every student to focus on their preferred direction. Our school teaches common subjects such as Dutch, English and maths, but what truly sets us apart are our innovative subjects, including the so-called 'day start'. Several times throughout the week, we create time and space for students to talk to a personal coach. Students take a central role during these sessions, while also focusing on media literacy and particular learning methods.

Over the course of four years at our small-scale school where everyone knows each other, students make great strides towards a diploma and young adulthood. Together, we have one overarching goal: to get the most out of every student. That's why we offer so-called bridge classes, where students can discover their interests and the subjects they excel at. We've noticed that following a good start and proper guidance, many students progress to a higher level. Furthermore, students can re-select their subject and theme classes each term.

This allows them to participate in all classes and after the second year choose their preferred learning pathway and final exams.

Any additional support we provide is always coordinated with students' parents and personal coaches. For instance, we have student tutors, the study class and tailor-made classes to help students reach their full potential in learning and life. For students who need just a little extra support to perform at their best, we also provide so-called 'focus classes'. These classes are deliberately smaller, so that there is enough time and attention for each pupil. Personal coaches teach multiple subjects, so that students receive more focused and personalised guidance.

During secondary school, we believe that students still have the world at their feet. Children should be given the opportunity to discover and make their own decisions from there. That's why we offer sufficient space for students to explore, experiment and grow. Everyone should feel comfortable in their own way and at their own level. You are more than welcome to come and explore with us. We look forward to meeting you!

Schans

Kom verder!

De Schans | Sleeuwijk Location

Pathways: vmbo bb / kb

Economy & Business, Care & Welfare, Services & Products

You'll quickly feel at home at De Schans in Sleeuwijk!
We are a small and friendly school, which means students get to know their teachers and classmates quickly. Students combine learning with practical activities. Furthermore, our school regularly organises fun and educational extracurricular activities.

At De Schans:
- we always take a positive approach to your future,
- we offer meaningful education,
- we do things together,
- we offer internships for every year of study,
- you make significant progress!

In the foundation stage (years 1-3), students are not only taught common subjects such as Dutch, English and mathematics, but also 'Talent Time' subjects. By participating in one of these subjects, students discover where their talents lie. They work independently or in a group, focusing on subjects such as engineering, cosmetics, cuisine, flora and fauna or technology.

In the advanced stage (following year 3), De Schans offers two additional learning pathways:

Care & Wellness
This pathway is for students who prefer to interact with people. Both theory and practical classes are taught in contemporary classrooms, where students have access to a baby room, hospital room, kitchen and beauty salon.

Services & Products
This pathway focuses on activities that are all about providing services to other people. An example of a service might be organising a winter fair. Products include promotional videos or 3D printed objects. De Schans has all the necessary tools and equipment for this.

Internships
In years 3 and 4, students participate in an internship 1 day per week. Here, they discover the ins and outs of various companies and institutions and the tasks that are performed within them. In other words: learning in practice!

Gymnasium Camphusianum

Camphusianum | Gorinchem Location

Pathways: gymnasium

Welcome to Gymnasium Campusianum!
We are a small school with a friendly atmosphere where all new VWO students are welcome. At Campusianum, students not only study for a school-leaving diploma, but also for their future careers. They gain broad subject knowledge and learn to think about issues in different ways. Students learn what is going on in the world around them. They learn to give opinions on matters from many different angles. After graduating from Camphusianum, students are able to step into the ever-changing world with confidence.

Campusianum is the school you're looking for, if...
- you enjoy the learning process;
- you're curious about the world around you;
- you're looking for a challenge;
- you prefer a small-scale school;
- you want to make friends for life.

Wondering whether we're the school for you? Please come and get to know us!

Camphusianum Junior
During a period of eight weeks, you can join us as a guest on Friday mornings to attend one of six modules. How about chemistry, classical languages and culture, or robotics classes? Those who are interested can sign up via the website.

Participation Days and Open Day
We have so-called Participation Days where students can take part in three trial classes, including Latin or Greek. The programme changes regularly, so please feel free to visit several times. Those who are interested can sign up via the website. During our Open Day, we open our doors to potential future students. Our students show guests around and answer their questions about our school.

De Joost

Doe, ervaar, leer

De Joost | Leerdam Location

Pathways: vmbo bb/kb

Commerce, Care & Wellness, Engineering, Sports & Services

De Joost is a school for lower secondary professional education (VMBO). Students learn with a laptop and from books, but most importantly through practical classes and direct experience. After graduating from De Joost, students can choose to go to school for the full week or a combination of learning and working at MBO level. Students can become craftspeople, specialists, managers or entrepreneurs.

De Joost is unique because of its small-scale nature. Everyone knows each other and their strengths and weaknesses. We seek the best opportunities, so that students get the most out of the learning process. At De Joost, every student is given the attention they deserve. Our strength lies in taking students' personal capabilities as a starting point. For example, students have the option of participating in subjects at a higher level than the level at which they currently are.

Our classes are small, so students learn optimally and receive sufficient attention. Students also regularly talk to their mentor to discuss their progress and future. For example, what are your dreams? Through conversations with these mentors, we are able to assess where students' strengths and weaknesses lie and help them even better. A school day at De Joost is always varied. Students participate in different classes throughout the day, including both theory and practical classes.

Practical learning is a learning style that suits our students. Students participate in an internship in every year. Important are the so-called 'project classes' that students participate in, in years 1 and 2. Here they learn in practice and discover where their interests lie. This makes it easier to make important decisions for the future. For example, this includes learning pathways and their education or career after graduating from De Joost. We also introduce students to opportunities in society, for example in the form of company visits. De Joost has close ties with business and civil society organisations.

De Noordhoek

Christelijke Praktijkschool

De Noordhoek | Gorinchem Location

Pathways: practical education, first year PrO-vmbo, DOKwerk

Practical education bears its fruits!

Our school is all about the practical application of knowledge and skills. In the foundation stage (years 1 and 2), the focus is on learning basic skills, basic knowledge and developing a good work ethic. The education programme in the advanced stage (years 3 to 5) focuses increasingly on specific vocational skills. Throughout the internship programme, students move from supervised internships (1 morning in year 2) to independent internships (3-4 days in year 5).

Practical education is super effective in this way!
96% of our graduates continue to employment or further education.

Practical education takes care of its students!
Students are at the heart of our school.

Practical education broadens students' horizons!
'Entry' Programme

- For pupils participating in Practical Education at level 1F.
- On graduation: MBO1 diploma

Sector-specific Programmes
After graduation, students are in the possession of a complete certificate.

denoordhoek.com

Altena College | Sleeuwijk Location

Pathways: mavo, havo, atheneum

Altena College - Taking care of each other!
Altena College is a Christian school for mavo, havo and atheneum students. Effective education and genuine care for our students are at the foundation of our school. We value proper guidance: whether students need a little extra help or could use a little more challenge.

In a friendly, warm environment, students have every opportunity to develop their talents. Our teachers do their best to get to know every student well. This way, they can help them graduate comfortably. We offer many (extra) subjects that students can choose from. New this year is the athletics track (right on our doorstep!), as well as drone flying lessons.

ENJOYING THE LEARNING PROCESS
It goes without saying that the secondary school years are about more than just education. That's why we also do a lot of fun things together. Students go on excursions, outings and trips abroad and can even participate in theatre performances and musicals, join the school orchestra, the media platform or the student council. In other words: there's something for everyone!

LOOKING FOR ADDITIONAL SUPPORT OR AN EXTRA CHALLENGE?
At Altena College, students can count on getting the support they need. This includes study guidance, support with dyslexia or giftedness, fear of failure and discussion and experience groups for those times of hardship (at home). Students are also free to visit our homework centre at any time. In close consultation, we seek to ensure students get the support they need.

altenacollege.nl

A SAFE ENVIRONMENT
What makes Altena College so special? It's the fact that we take good care of each other. We treat each other with respect, aggression is rare and there is a lot of focus on preventing bullying. We have clear rules, which ensures a pleasant atmosphere and environment.

FIVE REASONS TO CHOOSE ALTENA COLLEGE!
1. Mavo+ students can participate in exciting practical subjects.
2. Havo students have the opportunity to do internships at companies in the area.
3. Atheneum students can participate in additional subjects, such as philosophy.
4. At the Business School, students learn about business and economics.
5. There's an athletics track right on our doorstep!

And a secret sixth reason: because everyone feels at home and is friendly towards each other!

De Windroos

Durf te stralen

De Windroos | Gorinchem Location

Pathways: vmbo basis/kader
Professional Economy & Commerce, Care & Welfare, Services & Products classes

Welcome to De Windroos
We are a small-scale, Christian vmbo school in a beautifully renovated, historic building. In support of our students, we have a small, close-knit and enthusiastic team. Our mission is short and to the point: to make children shine. Together, we discover our students' strengths and weaknesses.
At De Windroos, we work according to the vocational college principle. Starting in year one, students participate in Economy & Commerce and Care & Welfare classes. We train our students to become true professionals in economics or service-based professions. Our students receive practical lessons from day one! At the end of year 1, students make a choice: Economy & Commerce or Care & Welfare?

Students who opt for Care & Welfare can work in our restaurant, for example, where around 20 - 25 people come to eat at any one time. They learn to work in the kitchen or how to become perfect hosts. We also have rooms with a hospital bed, a hairdressing salon and a place to practise beauty care. For those who choose Economy & Commerce, we have an office environment, a shop and a travel agency, among other things. Do you enjoy drawing, digital design or taking pictures? In year 3, students in Economics & Commerce can choose to participate in Media & Design classes.

Our education is varied. All students have their own laptop. We offer both theoretical and practical classes. Students also put their knowledge into practice outside school through internships at companies and institutions. Our school offers so-called learning and practice areas. Our school provides calm, the necessary structure and invites students to engage and learn. Are you curious about our school? Feel free to pay us a visit! You'll soon feel at home at De Windroos!

Gilde

Laat techniek werken

Het Gilde Vakcollege Techniek
Gorinchem Location

Pathways: vmbo basis/kader/GL, techniekhavo

Het Gilde Vakcollege Techniek is a school that offers technical education and pays great attention to students' individual support. We believe that skills and practical experience in the technical realm are extremely important. Especially for engineering companies, people with practical skills are just as important as those with theoretical knowledge.

We place great importance on everyone being friendly, transparent and caring towards each other. We introduce our students to Christ as an example and teacher, and we are guided by common standards from the Bible. Our faith encourages us to take life seriously, see others as fellow human beings, and positively contribute to society.

The tech companies in our region are very important for the economy. Without well-trained technical professionals, this sector would disappear, and our region would become less attractive for future residents. Fortunately, we notice regional companies are willing to invest in training young people in engineering. With its many member companies, our Wetech foundation plays an important role in this (www.stichtingwetech.nl).

We want young people to be motivated to develop technical skills and work towards their future. As the largest school for technical vmbo education in the Netherlands, we demonstrate that technical education works: every student is able to find work!

At Gilde, we prove that a career in engineering leads to success. We offer young people aged 12 to 20 who enjoy being practical a full training programme to become technical craftspeople. After graduation, students can start working immediately. Alternatively, they can continue to work on their future at Het Gilde. Together with regional engineering companies, we ensure that there are always sufficient technically trained professionals with the proper attitude available.

Yuverta

Yuverta Christelijk VMBO | Ottoland Location

Pathways: vmbo bb/tl and profession route

Green school

Yuverta Christelijk VMBO Ottoland is a green school where plants, animals, machines and creativity take centre stage. We are a school where students learn about nature and animals, but also about sustainability and the environment. This is especially important for our future. For example, students work in kitchen gardens, process local produce and engage in sustainable waste disposal. In this way, we contribute to a new, green world.

Yuverta Ottoland is a Christian school. As a school, we aim to provide a home for students who respect our Christian identity. We are a small school where everyone knows each other. We believe it is important for students to engage in those subjects that they excel at and enjoy.

Yuverta VMBO Ottoland offers the following learning programmes:

- Basic vocational programme (vmbo basis)
- 'Kader' vocational programme (vmbo kader)
- Mixed programme (vmbo gl)
- Theoretical programme (vmbo t)
- Profession route mbo 2

yuverta.nl

Calvijn

Ontdek je kracht

Calvijn | Hardinxveld-Giessendam Location

Pathways: vmbo gl/tl, foundation stage havo/atheneum and advanced stage techniekhavo

Calvijn is a school for vmbo-gl/tl and for the first three years of havo, atheneum and techniekhavo. Our Christian identity is an important educational principle at Calvijn, as is the support we provide to students. For many years now, Calvijn has delivered excellent educational results and graduation rates.

Calvijn provides students with a calm learning environment. At the same time, it is a school that provides a modern and challenging education. One of our unique programmes is techniekhavo. This is a havo programme with a lot of engineering classes, featuring carpentry, drilling, sawing, welding, milling and car repairs. Not necessarily to do this type of work in the future, but in order to acquire important skills. Techniekhavo is aimed at students who want to continue in the engineering field after they graduate. Calvijn is an innovative school where students are prepared for an ever-changing society. At Calvijn, every student has access to a laptop. We also work with textbooks, of course. An ideal mix of learning tools.

Calvijn is a school that contributes to personal development and growth in self-confidence. At Calvijn, students learn to be confident in life. We want to show that the biblical message of Faith, Hope and Love empowers students to make a difference in the world.

Calvijn is known for its solid care structure and additional support classes. We offer counselling for social emotional and learning difficulties. Besides individual tutoring, it is possible to take part in learning skills classes, extra tutoring or homework assistance. Year 2 offers additional courses for talent development, such as emergency care, entrepreneurship or Latin classes. We also organise sports activities for all students, including ice skating, fencing, mountain biking and climbing. Please visit our website for more information.

MUNIO
sterk naar de toekomst

vita college
oog voor jouw talent

vita food | vita tech | vita shop
vita green | vita wheels | vita sports

Vita College | Gorinchem Location

Pathways: Practical education, first year PrO-vmbo

Eye for your talent!

You're a go-getter who likes to work with your hands! Fortunately, we are the number one practical school in Gorinchem! We help you obtain official certificates. Not to mention, you can also participate in an Entry-junior programme. Want to familiarise yourself with our school first? Then sign up for our trial classes!

OUR SCHOOL

Our students and their parents consider Vita College a pleasant and safe environment. Our school has spacious corridors, classrooms and practice rooms. During breaks, students can find their preferred spot to relax, either in the canteen or the schoolyard.

At lunchtime, we give students free sandwiches and milk. Furthermore, there's always fruit or snack cucumbers and tomatoes available. The school is smoke- and alcohol-free.

The schoolyard supervisor ensures that breaks take place without incident. On Tuesdays and Wednesdays, employees from the Mall visit our school.

Our school works with six so-called Vita Tech, Vita Wheels, Vita Food, Vita Shop, Vita Green and Vita Sport talents. We do a lot of sports and exercise. Together we try to make our school the most pleasant environment possible.

LEARNING THROUGH PRACTICE

At our school, students learn through participation. Of course, they participate in Dutch, maths and English classes, but also in citizenship and social skills classes.
Students work a lot with the computer. This makes the learning process even more fun. Computers allow students to work at their own pace.

We offer many practical classes related to cooking, greenhouse work and engineering. Once students are ready, they can participate in an internship. Our school works to develop your competences. This means that you learn how to collaborate, organise and cope with potential setbacks.

vita-college.nl

Gomarus

Meer dan school alleen

De Gomarus | Gorinchem Location

Pathways: vmbo-bk, vmbo-t, foundation stage havo/vwo and advanced stage havo/vwo.

De Gomarus is a Dutch Reformed school. The Bible as God's Word is the basis for our teaching. It provides guidance on our interactions with each other, our use of language, our dress code and the content of classes. We start the school day with a prayer, singing a psalm and discussing a part of the Bible. Anyone who considers this identity important and supports the school's principles is more than welcome.

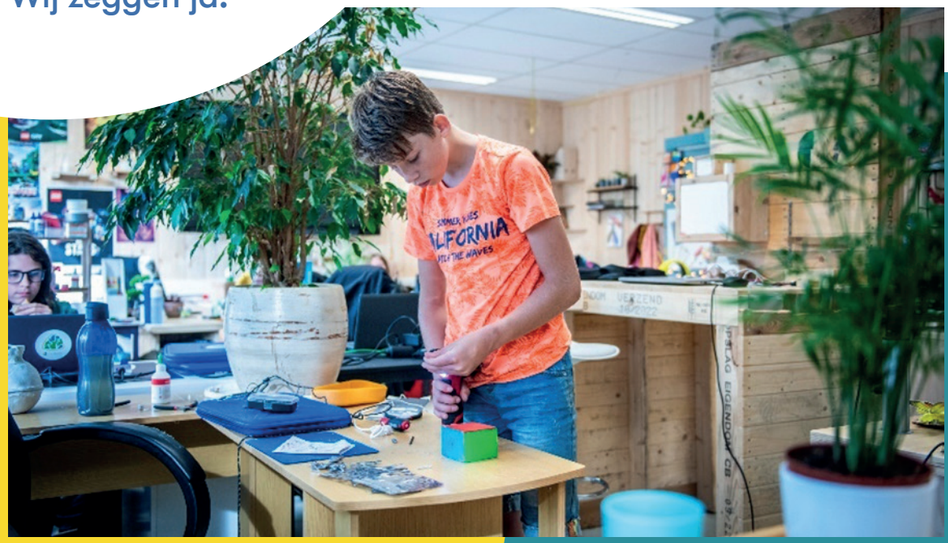

The working, learning and living climate at De Gomarus is generally perceived as pleasant, transparent and relaxed. Teachers are committed and enthusiastic. We consider structure and regularity to be important. At De Gomarus, mentors are designated persons offering support. We also offer many forms of additional counselling.

Our graduation rates are very high. For many years now, they have been at or above the national average. We offer all kinds of opportunities for students to develop their talents, for example in our practice departments.

To conclude, we would like to let one of our students, Lisanne, do the talking: 'At De Gomarus, you feel completely at home after just one week. I have nice classmates and friendly teachers. Of course, you have to work hard at times, but it's fun here too. If you are still looking for a pleasant school, I would definitely choose De Gomarus!'

De Delta

Wij zeggen ja!

De Delta | Gorinchem Location

Pathways: vmbo TL t/m VWO

Agora education at every level

At De Delta, our students take centre stage. Students follow their own learning pathways. We ask them what they would like to learn while simultaneously supporting them through coaching, inspiring them, challenging them and – above all – ensuring they have fun. Together we work on questions that we call 'Challenges'. We learn from and with each other. We provide inspiration classes on all kinds of topics by different types of people. We also frequently go on excursions to inspiring locations. We trust each other, ourselves and the process of freedom. We believe each student's learning pathway should be respected, in an environment where they can truly be themselves.

We say yes!

Munio Partnership

Munio is an organisation that connects schools. The schools in our region (Gorinchem, Leerdam, Ottoland, Sleeuwijk and Hardinxveld-Giessendam) are all connected through the Munio partnership. In other words, Munio itself is not a school and you cannot enrol at Munio.

Munio supports schools with regard to offering suitable education and helping students where necessary. Schools, parents and students can all provide their input to Munio.
